

ROTARY PARLOR SHUTTLE

FOR SAFE AND HUMANE TRAINING

*Minimize Startup Stress
in Rotary Milking Parlors*

Installing a Rotary Milking Parlor?

Consider the benefits of an integrated Sturdy Built Rotary Parlor Shuttle

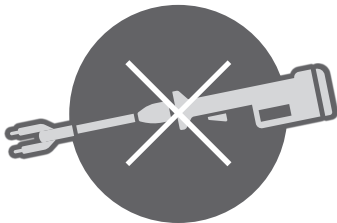

Accelerated Cow Training

Quickly reduce the amount of time it takes for both your new cows and first-calf heifers to adapt to the rotary parlor routine through the gentle and consistent encouragement of the rotary parlor shuttle. It is as effortless as pushing a button. The training period becomes rewarding, with more cows milked in less time.

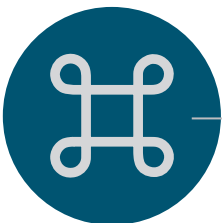

Safety Oriented

Safety for you and the cows! Manage the herd from the protection of your workstation. The Sturdy Built rotary parlor shuttle is designed to gently handle every cow, even when they need encouragement. Avoid the accidents that can happen when cows get confused and workers are in their way. Keep productivity moving in the right direction.

Less Stress = Improved Milk Let-Down

Don't give your workers the opportunity to compromise the animal welfare requirements of today. Both fear and stress in cows increases the heart rate and blood flow to the muscles, blocking the action of oxytocin which works as the milk let-down. Provide a tool that is safe and humane while maintaining a calm atmosphere. Avoid unnecessary drama by simply activating the rotary parlor shuttle when the cow flow begins to stall.

A Universal Design Customized

Our universal design allows the parlor shuttle to be integrated into the cow traffic system of most rotary parlor brands and can be retrofitted for existing parlors. Our designers will team up with you on your project to make sure that everything is delivered per your specs. Each unit is shipped pre-assembled to minimize installation and setup labor. Everything can be up and running smoothly within a matter of hours.

Rotary Parlor Shuttle Features

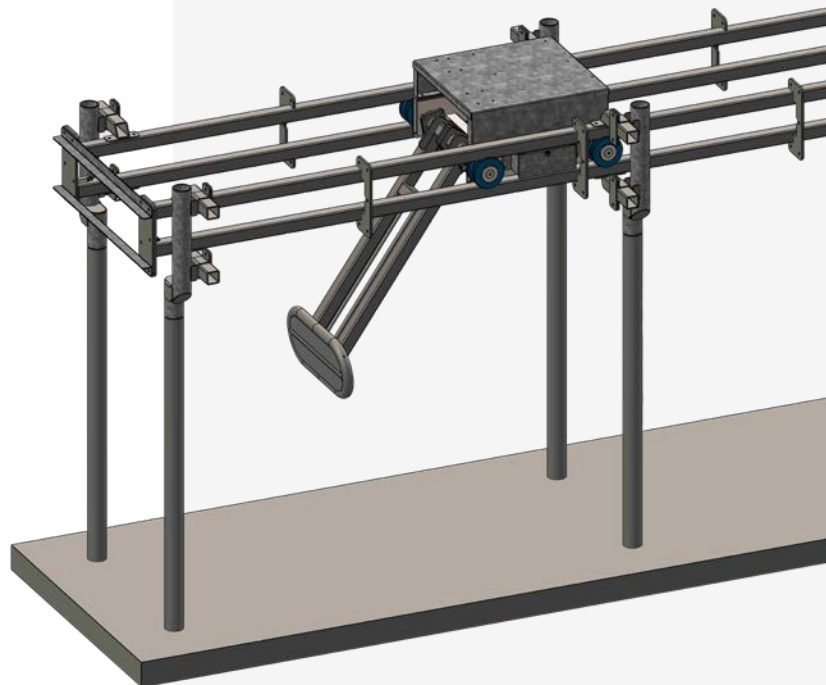

- Made to fit most rotary parlor brands. Can be retrofitted for existing parlors
- Available in stainless steel or hot-dipped galvanized finish
- Self contained hydraulic unit with wireless remote control operation
- Powered by single or 3 phase electric
- Mounting hardware to fit your supports
- Custom length, height and options, configured to accomodate your specific needs

Bring Your Dimensions!

With the measurements and specifications you provide, the design team at Sturdy Built custom-fits each unit to best suit operations. Call to discuss your milking center layout!
